

Tokyo Foreign Exchange Market Committee

July 29, 2013

Results of Turnover Survey of Tokyo Foreign Exchange Market

The Tokyo Foreign Exchange Market Committee (TFEMC) today released the results of its Turnover Survey of Tokyo Foreign Exchange Market covering transactions in April 2013 (see attached tables).

The TFEMC conducts the survey in order to provide market participants with the developments of the Tokyo foreign exchange market in an accurate and timely manner, thereby contributing to the sound growth of the market. In conducting the survey, the Financial Markets Department of the Bank of Japan provides technical assistance in collecting and processing the data of respective respondents.

The TFEMC had carried out the survey annually covering foreign exchange transactions in April until 2011, but increased the frequency of the survey from once a year to twice a year covering transactions both in April and October in order to grasp the market developments more timely. This is the ninth survey since the survey started in 2006.

The monthly foreign exchange turnover in April 2013 increased compared with the last survey covering transactions in October 2012. Regarding the trading instrument, the turnover in spot transactions increased significantly and that in forward transactions and foreign exchange options increased, while that in swap transactions decreased. By execution method, the volume of electronic trading continued to increase.

Tokyo Foreign Exchange Market Committee

<Notes>

The TFEMC conducts the turnover survey on foreign exchange and OTC derivatives market activity. The TFEMC had carried out the survey annually covering foreign exchange transactions in April until 2011 but increased the frequency of the survey in 2012 from once a year to twice a year covering transactions both in April and October. The attached results show the turnover in April 2013. This survey covers 32 financial institutions in the same way as the last survey and summarizes three types of foreign exchange transactions (spot, foreign exchange swap, and forward transactions) and one type of derivatives (foreign exchange options). Similar surveys are conducted and released by overseas foreign exchange market committees.

1. Turnover in nominal or notional principal amounts in April 2013.
2. Reporting dealers refer to financial institutions which are the respondents to this survey.
3. Other interbank dealers refer to interbank dealers other than reporting dealers.
4. Other financial customers refer to financial institutions other than reporting dealers and other interbank dealers (central counterparties, regional banks, regional banks II, *shinkin* banks, credit cooperatives, labor banks and the Rokinen Bank, agricultural cooperatives, credit federations of agricultural cooperatives, fishery cooperatives, prefectural credit federations of fishery cooperatives, mutual funds, pension funds, hedge funds, MMFs, lease companies, insurance companies, finance companies, postal savings, government financial institutions such as the Japan Finance Corporation and the Development Bank of Japan, and central banks).
5. Transactions with retail margin broker firms are included in “with non-financial customers.”
6. Geographical distinction between “local” and “cross-border” is based on the location of the sales desk of a counterparty. Any transactions with overseas branches or subsidiaries are included in “cross-border.”
7. Spot: Single outright transaction involving the exchange of two currencies at a rate agreed on the date of the contract for value or delivery within two business days. A leg of FX swap transactions is excluded.

FX Swap: Contract which commits two counterparties to exchange streams of interest payments in different currencies for an agreed periods of time and to change principal amounts in different currencies at a pre-agreed exchange rate at maturity. A leg of spot transactions is excluded.

Forwards: Transaction involving the exchange of two currencies at a rate agreed on the date of the contract for value or delivery at some time in the future (more than two business days later). Foreign exchange agreement transactions and NDFs are included.

FX Option: Option contract that gives the right to buy or sell a currency with another currency at a specified exchange rate during a specified period.

8. Non-dollar amounts should be converted into USD using exchange rates prevailing on the transaction date. If this is impractical or impossible, data may be reported using average or end-of-period exchange rates.

9. In millions of USD. Data should be rounded to the nearest million USD.
